Prysm Go

Take your meeting rooms from functional to brilliant

Prysm Go is the quick, easy, and elegant way to upgrade your physical meeting spaces with advanced collaboration features — including a digital whiteboard, wired and wireless screen sharing, and integration with your existing video conferencing and Skype for Business.

Unlike other solutions, you can deploy Prysm Go in any IT environment. Use it to add intelligence to your existing meeting-room displays or pair it with a stunning Prysm 85" 4K display and stand.

With Prysm Go, you can instantly transform your meeting rooms...without refreshing your hardware or overhauling your IT infrastructure.

The Prysm Difference:

- Scalable to any screen size
- All-in-one solution option
- Works with any display
- Integrates with live sources

The most intuitive interface

Prysm Go greets you with a friendly welcome screen featuring just four self-explanatory options. Users can access every feature with a single touch...no training necessary.

Direct path to digital transformation

Prysm Go gives you the option to upgrade to a full digital workplace experience to support your entire organization (including remote participants) with persistent cloud-based workspaces, mobile-device access, and the ability to access and share your mission-critical apps and content on a single canvas — no additional hardware or installation required.

Features

Prysm Go provides the following functionality:

- **Sketchboard:** An ultra-responsive digital whiteboard offering different background colors, grid lines, and the ability to share the content via email directly from the interface.
- **Connect device:** Quickly share device content via a wired HDMI connection or wireless screen sharing (Apple Airplay or Google Cast).
- **Content annotation:** Annotations on shared content bring focus to the meeting or add comments and suggestions. Quickly distribute content snapshots with annotations via email directly from the interface.
- **Live content-source integration:** Connect any live video or data source, such as dashboards, video feeds, or existing video conference codecs via HDMI for easy access. Users can annotate and take snapshots of sources for later reference.
- **Integrated video conferencing and Skype for Business:** Invite remote participants to share the experience via Cisco and Polycom video and audio conferencing.
