Figure 1.

Cisco Webex Room 70 Dual G2 and Room 70 Single G2 on a free-standing floor stand

Cisco Webex® Room 70 G2 delivers the industry-leading video and audio experience customers have come to expect from Cisco. In addition, new capabilities enable even smarter meetings, smarter presentation capabilities, and smarter room and device integrations – further removing the barriers to usage and deployment of video in large-sized rooms. The Room 70 G2 is built on the powerful Cisco® Webex Room Kit Pro technology platform. This means there are more inputs and outputs to cover more meeting scenarios and larger rooms by adding another screen for content or installing a Cisco TelePresence® Precision 60 Camera in the back to give presenters flexibility to move around. The Room 70 G2 now offers more power and flexibility to build custom and more specialized video conference rooms than ever before.

The Room 70 G2 – comprising a powerful codec, a quad camera, and 70-inch single or dual 4K displays with integrated speakers and microphones* – is ideal for rooms that seat up to 14 people. It offers sophisticated camera technologies that bring speaker-tracking and auto-framing capabilities to medium to large-sized rooms. The product is rich in functionality and experience, and designed to be easily scalable to all of your large conference rooms and spaces, whether registered on the premises or to Cisco Webex through the Cisco Collaboration Cloud.

* Integrated microphones for speaker tracking only
