Expansion Module

EXP20

Dear Customers,

Yealink hereby informs you that the EXP20 Expansion Module has been discontinued since 2021-09-30. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on EXP20 Expansion Module, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP20 Datasheet, please refer to: [EXP20 Support](#).

EXP38

Dear Customers,

Yealink hereby informs you that EXP38 Expansion Module has been discontinued since December 31, 2015. After the date, the order for new product would not be accepted.

Yealink does not intend to pursue new feature development on EXP38 Expansion Module. But Yealink follows industry standard practices regarding the support of its software for discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP38 Datasheet, please refer to: [EXP38 Support](#).

EXP39

Dear Customers,

Yealink hereby informs you that EXP39 Expansion Module has been discontinued since December 31, 2015. After the date, the order for new product would not be accepted.

Yealink does not intend to pursue new feature development on EXP39 Expansion Module. But Yealink follows industry standard practices regarding the support of its software for discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP39 Datasheet, please refer to: [EXP39 Support](#).

EXP40

Dear Customers,

Yealink hereby informs you that the EXP40 Expansion Module has been discontinued since 2021-12-31. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on EXP40 Expansion Module, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP40 Datasheet, please refer to: [EXP40 Support](#).

EXP43

Color Expansion Module

The Yealink EXP43 Color Expansion Module for Yealink T43U/T46U/T48U IP phones, is designed to expand the functional capability of your SIP phone to a whole new level. It features a large 4.3-inch color-screen LCD, giving you a vivid visual experience. In addition, it provides you with a simple user interface and advanced call handling capabilities. For example, three pages of 20 flexible button shown on the display can be programmed up to 60 various features. The functionality of Yealink T43U/T46U/T48U IP phones will also be extended by the EXP43, you can set the provided multi functional line keys as BLF, speed dial, call forward, transfer, call park, call pickup, etc. The Yealink EXP43 Color Expansion Module is an ideal solution for receptionists, administrative assistants and contact center workers and gives you the ability to monitor contacts and manage a large volume of calls with ease.

Key Features and Benefits

- 4.3" 272 x 480-pixel color screen
- Color icons for rich visual experience
- 20 physical keys on each page with dual-color LEDs
- Three independent control keys with illuminated LED for fast switching pages
- Supports up to 3 modules daisy-chain
- Stand with 2 adjustable angles

User-friendly Structure Design

With a 4.3-inch color screen, the Yealink EXP43 expansion module is intended to bring a fresh visual experience and an easy operating experience to you. To ensure a higher reliability of data transmission and a higher speed of data refresh, a USB cable is chosen to connect EXP43 expansion module to Yealink T43U/T46U/T48U IP phones. Moreover, after the connection between the expansion module and the IP phone is establish, the remaining USB port on the back of EXP43 can also be used to realize the phone's extended functions, for example, call recording via USB flash drive, etc.

Intuitive Visualization

A 4.3-inch 272x480-pixel color screen greatly enriches your visual experience. The color icons for DSS keys, the feature of Wallpaper and Screensaver, all of these offer you a new operating experience as well as allow you to custom the EXP43 in your own style. More than that, its 3 independent control buttons with illuminated LED are used for fast switching to the

corresponding page.

High Expansibility

The Yealink T43U/T46U/T48U IP phones can be fully equipped with up to three EXP43 Color Expansion Modules, while adding 180 additional buttons at most. Three pages of 20 flexible buttons with dual-color LED shown on the display can be programmed up to 60 various features for speed dialing, BLF/BLA, call forward, transfer, etc. Thus, it will help you effectively manage high volume of concurrent calls, effortlessly monitor calls and greatly boost personal productivity.

EXP50

A High-performance Color-screen Expansion Module

The Yealink EXP50 Color-screen Expansion Module for Yealink T53/T53W/T54W/T57W/T58A/T58W IP phones, is designed to expand the functional capability of your SIP phone to a whole new level. It features a large 4.3-inch color-screen LCD, giving you a vivid visual experience. In addition, it provides you with a simple user interface and advanced call handling capabilities. For example, three pages of 20 flexible button shown on the display can be programmed up to 60 various features. The functionality of Yealink T53/T53W/T54W/T57W/T58A/T58W IP phones will also be extended by the EXP50, you can set the provided multi functional line keys as BLF, speed dial, call forward, transfer, call park, call pickup, etc. The Yealink EXP50 Color-screen Expansion Module is an ideal solution for receptionists, administrative assistants and contact center workers and give you the ability to monitor contacts and manage a large volume of calls with ease.

Key Features and Benefits

- 4.3" 272 x 480-pixel color screen
- Color icons for rich visual experience
- 20 physical keys on each page with dual-color LEDs
- Three independent control keys with illuminated LED for fast switching pages
- Supports up to 3 modules daisy-chain
- Stand with 2 adjustable angles

User-friendly Structure Design

With a 4.3-inch color screen, the Yealink EXP50 expansion module is intended to bring a fresh visual experience and an easy operating experience to you. Its new design for the Stand enables you to adjust between two lying angles easily even without disassembling it. To ensure a higher reliability of data transmission and a higher speed of data refresh, a USB cable is chosen to connect EXP50 expansion module to Yealink T53/T53W/T54W/T57W/ T58A/T58W IP phones. Moreover, after connecting to the IP phones successfully, the remaining USB port in the back of EXP50 can also be used to realize the phone's extended functions, for example, call recording via USB flash drive, etc.

Intuitive Visualization

A 4.3-inch 272x480-pixel color screen greatly enriches your visual experience. The color icons for DSS keys, the feature of Wallpaper and Screensaver, all of these offer you a new operating experience as well as allow you to custom the EXP50 in your own style. More than that, its 3 independent control keys with illuminated LED on the bottom are used for fast switching to the corresponding page.

High Expandability

The Yealink T53/T53W/T54W/T57W/T58A/T58W IP phones can be fully equipped with up to three EXP50 Color-screen Expansion Modules, while adding 180 additional buttons at most. Three pages of 20 flexible button with dual-color LED shown on the display can be programmed up to 60 various features that can be used for speed dialing, BLF/BLA, call forward, transfer, etc. Thus, it will help you effectively manage high volume of concurrent calls, effortlessly monitor calls and extremely boost personal productivity.

Wireless Headset Adapter

EHS35

Talk and receive calls everywhere

The new and advanced Yealink Headset Adapter EHS35 provides a technical interface between your Yealink IP phones (T3X series) and a compatible Yealink wireless headset (WH62/WH63).

The unit is easy to install, simply link EHS35 to the RJ9 (4P4C) headset port of the phone. Its plug-and-play effectively gives you the ability to remotely control your Yealink phone calls, including answering, rejecting, holding, muting, hanging up, switching between multiple calls, and adjusting the volume.

Key Features and Benefits

- Support Yealink wireless headset (WH62/WH63) only
- Control phone through wireless headset
- Plug and play
- Easy to use

Specifications

Specifications	Description
Main Features	<ul style="list-style-type: none"> · Compatible with Yealink wireless headsets (WH62/WH63) · Plug and play · Incoming calls are signalled in the headset earpiece · Remote control feature: <ul style="list-style-type: none"> - Answer calls - Reject calls - Hang up calls - Switch between multiple calls - Hold - Mute - Adjust the volume

EHS36

Talk and receive calls everywhere

The new and advanced Yealink Headset Adapter EHS36 provides the technical interface between your Yealink T48S/T46S/T42S/T41S/T48G/T46G/T42G/T40G/T40P/T41P/T29G/T27G/T27P IP Phones and a compatible wireless headset. It is approved for using with major manufacture Jabra and Plantronics wireless models.

The unit is easy to install, simply link EHS36 to the EXT port of the phone and, effectively 'plug and play' giving you control of your Yealink phone and the ability to answer and hang up calls remotely.

It has been especially designed to ensure maximum productivity in business applications such as receptions, call centers and general telephone use and is ideal for the Corporate, Financial, Health, Government, Educational, Industrial, and SME/SoHo market sectors.

Key Features and Benefits

- Compatible with Jabra and Plantronics
- Control phone through wireless headset
- Plug and play
- Easy to use

Wi-Fi USB Dongle

WF40

New Wi-Fi Life for Your IP Phone

Wi-Fi USB Dongle WF40 is a low-power, small form factor device that can be implemented within offices for seamlessly connecting their IP phones to available wireless networks. This dynamic plug-and-play style USB device is an ideal office networking solution for companies—particularly, smaller organizations—seeking affordable, convenient and reliable high-speed wireless connectivity.

Supported by a powerful transmission rate of 150 Mbps, the solution is able to quickly and reliably establish Wi-Fi connectivity so that users can optimally communicate, collaborate, access pertinent documents and resources and more. Wi-Fi USB Dongle WF40 is safe, reliable and easy deployment, which guarantees a flexible and optimal user experience.

Even more, Wi-Fi USB Dongle WF40 is compliant with the IEEE802.11n and IEEE802.11b/g standards, maximizing reliability and throughput.

Key Features and Benefits

- Supports Yealink SIP-T27G/T29G/T46G/T48G/T41S/T42S/T46S/T48S/T42U/T43U/T46U/T48U/T52S/T54S/T53
 - For T48G: upgrade to the version of 35.80.0.95 or higher
 - For T29G/T46G/T46S/T48S: upgrade to the version 81 or higher
 - For T27G/T41S/T42S: upgrade to the version of x.81.0.110 or higher
- Reliable Connection
- Ease-of-use
- Plug and Play

- High Transmission Rate
- Lower Power Consumption

WF50

Dual Band Wi-Fi USB Dongle

Yealink WF50 is a next-generation Wi-Fi USB Dongle, designed to allow users to select whether to connect to a 2.4GHz (150 Mbps) Wi-Fi network or a 5GHz (up to 433 Mbps) Wi-Fi network. With wireless connections transiting over the 5GHz band, users no longer need to worry about the interference from nearby wireless devices which may interfere with their wireless signal, guaranteeing high-quality connections perfect for establishing calls and HD video streaming.

This dynamic plug-and-play style USB device is equipped with WPA/WPA2 encryptions, providing your network with active defense against security threats. Besides, WF50 owns the ability to establish Wi-Fi connectivity easily, quickly, and reliably, so that users can optimally communicate, collaborate and more.

Yealink WF50 is compliant with IEEE 802.11a/b/g/n/ac standard, maximizing reliability and throughput.

Key Features and Benefits

- WF50: compatible with Yealink SIP-T27G/T41S/T42S/T46S/T48S/T42U/T43U/T46U/T48U/T52S/T54S/T53 IP Phone (Version 84 or later) and Teams T55A/Skype for BusinessT55A/Teams T56A/Skype for BusinessT56A/Teams MP54/Skype for Business MP54
- WF50 (V1): compatible with Yealink SIP-T42U/T43U/T46U/T48U (108.86.0.70 or later), Yealink SIP-T53 (96.86.0.70 or later) and Teams MP54

Bluetooth USB Dongle

BT40

Dear Customers,

Yealink hereby informs you that the BT40 has been discontinued since May 31, 2019. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on BT40, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about BT40 Datasheet, please refer to: [BT40 Support](#).

BT41

USB Dongle for Bluetooth Headsets

The Bluetooth USB dongle adds Bluetooth connectivity to your IP Phone with a wide variety of Bluetooth Headsets, allowing you to receive calls wherever you are in the office. Compatible with Bluetooth specification V4.1, back compatible with Bluetooth 1.1, 1.2, 2.0 and 3.0 for wide-ranging use.

Key Features and Benefits

- Supports Yealink SIP-T27G/T29G/T46G/T48G/T41S/T42S/T46S/T48S/T42U/T43U/T46U/T48U/T53
- Answer/Terminate calls through wireless headset
- 10 m Range

Wireless Expansion Microphone

CPW65

CP Wireless DECT Expansion Mic CPW65

The Yealink CPW65 is a Wireless Expansion Mic that works as an audio input device for Yealink CP965 conference phone. Covered with black fabric (the same material as CP965), CPW65 is elegant, waterproof, greaseproof, and antifouling. Its 3 built-in microphones support a 360-degree voice pickup range with a 10-foot (3-meter) radius, which can guarantee you a balanced and crystal-clear audio experience. You can easily expand the voice pickup range of CP965 by connecting it to 2 CPW65 wirelessly, and the connection distance is up to 20 meters. CPW65 is easy to use with intuitive capacitive mute buttons. What’s more, just by randomly putting CPW65 on the charger cradle, the charging is proceeding without worrying about its direction. Its long battery life can offer you 11-day standby time or 12-hour talk time, saving you from frequent charging. All of the advantages make CPW65 an ideal choice for organizations that need optimal microphone placement and wider room coverage.

DECT USB Dongle

DD10K

Yealink Ruggedized DECT Handset

The Yealink DECT dongle DD10K not only enables T41S/T42S/T54W to work concurrently with the Yealink DECT system as a handset after pairing with Yealink W60B/W70B/W80B/W90B DECT IP base station, but also enables T53/T53W/T54W/T57W/T58A/T58W/VP59 to work as a base station which can be registered with up to 4 compatible Yealink W52H/W56H/W53H/W73H/W78H/W57R/W59R handsets. Supported by a powerful transmission rate of 1152kbps/s, this solution provides you with a quick and reliable DECT connection without wiring or cabling troubles, and gives you the privilege of enjoying wireless communications in minutes. As a complement to the Yealink DECT series, attaching DD10K to your desk phone offers a new solution by combining the desk phone's features with DECT capabilities.

Yealink DD10K complies is easy and safe to deploy, guaranteeing a flexible and optimal user experience.

Key Features and Benefits

Quick Start Guide

Expansion Module

EXP20

Dear Customers,

Yealink hereby informs you that the EXP20 Expansion Module has been discontinued since 2021-09-30. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on EXP20 Expansion Module, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP20 Quick Start Guide, please refer to: [EXP20 QSG](#).

For more information about EXP20 User Guide, please refer to: [EXP20 User Guide](#).

EXP38

Dear Customers,

Yealink hereby informs you that EXP38 Expansion Module has been discontinued since December 31, 2015. After the date, the order for new product would not be accepted.

Yealink does not intend to pursue new feature development on EXP38 Expansion Module. But Yealink follows industry standard practices regarding the support of its software for discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP38 Quick Start Guide, please refer to the attachment.

EXP39

Dear Customers,

Yealink hereby informs you that EXP39 Expansion Module has been discontinued since December 31, 2015. After the date, the order for new product would not be accepted.

Yealink does not intend to pursue new feature development on EXP39 Expansion Module. But Yealink follows industry standard practices regarding the support of its software for discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP39 Quick Start Guide, please refer to the attachment.

EXP40

Dear Customers,

Yealink hereby informs you that the EXP40 Expansion Module has been discontinued since 2021-12-31. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on EXP40 Expansion Module, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about EXP40 User Guide, please refer to: [EXP40 User Guide](#).

EXP43

Package Contents

Connect to the Phone

1. Connect the EXP43 and the phone using the supplied screws and connecting sheet, as shown below:

Your phone and the expansion module will be connected as shown below:

Connect Two Expansion Modules

1. Follow the same step to connect two expansion modules:

Your phone and the two expansion modules are connected as shown below:

NOTE

The T43U/T46U/T48U IP phone can support 3 expansion modules at most. But if you use the expansion module on the T43U or use more than one expansion module on the T46U/T48U, you need to connect an additional Yealink power adapter (5V/2A) to any one of the expansion modules. The power adapter should be purchased separately
...

Connect the USB Cable

Connect the USB jack of the IP phone and the mini USB jack of the first module using a USB cable. If you want to connect another module, connect the USB jack of the first module and the mini USB jack of the second module using a USB cable.

As shown below:

Connecting Cord

TIP

You just need to connect the USB jack of the previous module and the mini USB jack of the next module using a USB cable.

Then you can attach the stand, the power adapter and the Ethernet cable to the phone, connect the handset and headset to use.

Assemble the EXP43

Attach the stand, as shown below:

Desk Mount Method

Wall Mount Method(Optional)

Basic Configurations

The EXP43 supports 60 DSS keys in three screen pages. Each page displays 20 DSS keys.

You can press **1**, **2** or **3** to switch to the corresponding page and use your desired DSS key.

You can assign a feature to a DSS key via phone user interface. Press the desired DSS key of EXP43 for about 5 seconds, the phone LCD screen will prompt the setting of this key.

The following sections provide you with detailed instruction of assigning some frequently used features to the DSS keys via web user interface.

Conference

The conference key allows you to set up a conference with a third party when already in a call.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Conference** from the **Type** drop-down menu.
3. Enter the phone number or extension of the destination party in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Click **Confirm** to accept the change.

Forward

When there is an incoming call, you can press the forward key to forward the incoming call to the pre-defined destination number.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Forward** from the **Type** drop-down menu.
3. Enter the destination number to forward the incoming calls to in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Click **Confirm** to accept the change.

Transfer

You can press the transfer key to perform a Blind/Semi-Attended/Attended transfer during a call.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Transfer** from the **Type** drop-down menu.
3. Enter the phone number you want to transfer the call to in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Click **Confirm** to accept the change.

Hold

You can press the hold key to hold and retrieve a call.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **DND** from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
4. Click **Confirm** to accept the change.

DND

You can press the DND key when the phone is idle to activate or deactivate the DND mode.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **DND** from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.

4. Click **Confirm** to accept the change.

Recall

You can place a call back to the caller of the last incoming call by pressing the ReCall key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Recall** from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
4. Click **Confirm** to accept the change.

SMS

You can access the SMS more quickly and easily by pressing the SMS key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **SMS** from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
4. Click **Confirm** to accept the change.

Direct Pickup

If you press the direct pickup key when the specific phone number receives an incoming call, the call is answered on your phone.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Pickup** from the **Type** drop-down menu.
3. Enter the direct call pickup code followed by the specific number that you want to pick up a call from in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Group Pickup

You can pick up the incoming call of the pre-defined group by pressing the group pickup key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select Group Pickup from the **Type** drop-down menu.
3. Enter the group call pickup code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Call Park

You can park a call at an extension by pressing the call park key. The current call is put on hold and can be retrieved on another IP phone.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Call Park** from the **Type** drop-down menu.
3. Enter the call park code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Voice Mail

You can access the voice mail more quickly by pressing the voice mail key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Voice Mail** from the **Type** drop-down menu.
3. Enter the voice mail access code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Speed Dial

You can speed up dialing the numbers which are frequently used or hard to remember by pressing the speed dial key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **SpeedDial** from the **Type** drop-down menu.
3. Enter the desired number you want to dial out directly in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Intercom

You can connect to the operator or the secretary more quickly by pressing the intercom key in an office environment.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Intercom** from the **Type** drop-down menu.

3. Enter the remote extension number in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Line

You can configure a DSS key as the line key. It performs the same as a hard line key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Line** from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
4. Select the desired line from the **Line** drop-down menu.
5. Click **Confirm** to accept the change.

BLF

The BLF key allows you to monitor the status of the pre-defined number. You can also pick up incoming calls of the monitored number.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **BLF** from the **Type** drop-down menu.
3. Enter the phone number or extension you want to monitor in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Enter the directed call pickup code in the **Extension** field.
7. Click **Confirm** to accept the change.

Group Listening

You can configure a DSS key as the group listening key. Then you are allowed to activate the Speakerphone and Handset/Headset at the same time by pressing the group listening key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select Group Listening from the **Type** drop-down menu.
3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
4. Click **Confirm** to accept the change.

FAQ

I have an IP Phone with an EXP module connection, but I need to connect the phone to a headset with an EHS adapter. How can I connect them?

You can connect the headset to the USB port on the EXP module, but we recommend connecting your phone to Yealink headsets for better compatibility.

Screw

Quick Start Guide

Connect to the Phone

1. Connect the EXP50 and the phone using the supplied screw and connecting sheet, as shown below:

You may need to pull out the silica gel on the phone when connecting expansion module.

Connect Two Expansion Modules

1. Follow the same step to connect two expansion modules:

The slots are plugged up by silica gel. You can pull out the silica gel when cascading expansion modules.

Your phone and the two expansion modules are connected as shown below:

NOTE

The T53/T53W/T54W/T57W/T58A/T58A with camera IP phone can support 3 expansion modules at most. But if you use more than one expansion module, you need to connect an additional Yealink power adapter (5V/2A) to any one of the expansion modules. The power adapter should be purchased separately.

Connect the USB Cable

Connect the USB jack of the IP phone and the mini USB jack of the first module using a USB cable. If you want to connect another module, connect the USB jack of the first module and the mini USB jack of the second module using a USB cable.

As shown below:

Connecting USB Cable

TIP

You just need to connect the USB jack of the previous module and the mini USB jack of the next module using a USB cable.

Then you can attach the stand, the power adapter and the Ethernet cable to the phone, connect the handset and headset to use.

4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Group Pickup

You can pick up the incoming call of the pre-defined group by pressing the group pickup key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select Group PickUp from the **Type** drop-down menu.
3. Enter the group call pickup code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Call Park

You can park a call at an extension by pressing the call park key. The current call is put on hold and can be retrieved on another IP phone.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Call Park** from the **Type** drop-down menu.
3. Enter the call park code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Voice Mail

You can access the voice mail more quickly by pressing the voice mail key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Voice Mail** from the **Type** drop-down menu.
3. Enter the voice mail access code in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Speed Dial

You can speed up dialing the numbers which are frequently used or hard to remember by pressing the speed dial key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **SpeedDial** from the **Type** drop-down menu.
3. Enter the desired number you want to dial out directly in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Intercom

You can connect to the operator or the secretary more quickly by pressing the intercom key in an office environment.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Intercom** from the **Type** drop-down menu.
3. Enter the remote extension number in the **Value** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.

5. Select the desired line from the **Line** drop-down menu.
6. Click **Confirm** to accept the change.

Line

You can configure a DSS key as the line key. It performs the same as a hard line key.

1. Click **DSSKey > Ext Key**.
2. In the desired DSS key field, select **Line** from the **Type** drop-down menu.

Wireless Headset Adapter

EHS35

Package Contents

Connect the IP Phone and Headset

The WH62/WH63 headset version must be 104.434.0.15 or later.

You can check out the headset version via Yealink USB Connect (PC). Download: <https://www.yealink.com/product/yuc>.

Connect the Mitel & Unify Phone

You need to do the following on the WH62/WH63:

1. Before a call, press the **PC** button on the base to enable the audio channel. The LED indicator of the **PC** button turns solid green.
2. After a call, press the **PC** button on the base again or dock the headset to the base to disable the audio channel. The LED indicator of the **PC** button turns off.
3. The call can only be controlled on the IP phone.

Connect the Avaya/Poly/GS/Fanvil/Snom IP Phone

You need to do the following:

Step 1: For IP Phones, you need to press the **PC** button on the phone to set the audio device as a headset. The call can only be controlled on the IP phone.

Step 2: For WH62/WH63:

- Before a call, press the **PC** button on the base to enable the audio channel. The LED indicator of the **PC** button turns solid green.
- After a call, press the **PC** button on the base again or dock the headset to the base to disable the audio channel. The LED indicator of the **PC** button turns off.

Connect the Yealink IP Phone

You need to do the following:

Step 1: For IP Phones, you need to press the **PC** button on the phone to set the audio device as a headset. The call can only be controlled on the IP phone.

Step 2: For WH62/WH63:

- Before a call, press the **PC** button on the base to enable the audio channel. The LED indicator of the **PC** button turns solid green.
- After a call, press the **PC** button on the base again or dock the headset to the base to disable the audio channel. The LED indicator of the **PC** button turns off.

NOTE

If it is connected to a T3X series IP phone, the WH62/WH63 can directly control the call. We recommend updating the T3 series phones to the latest firmware version. For more details, please scan the QR code.

For more information, please refer to [EHS35/EHS60/EHS61 Wireless Headset Adapter Guide](#).

NOTE

- Connect Yealink T3X series phones: EHS35 supports WH62/WH63 to control phone calls and transmit audio.
- Connect Yealink T58, T67LTE, T4XS, T4XU, T5XW, T2XG, T4XG, VP59, MP5X: EHS35 can only transmit audio.

[How to use EHS35 with T3 series phones and WH62/WH63 headsets together?](#)

EHS36

Package Contents

Port Description

No.	Description
①	Connect this port and the IP phone EXT/EHS port or Expansion Module EXT port (the expansion module has been connected to the phone) using the RJ12 cord.
②	Connect this port and the Jabra(GN Netcom)/Sennheiser Wireless headset using the RJ45 cord.
③	Connect this port and the Plantronics Wireless headset using the 3.5 mm DC jack.

Cord Description

In addition to the cords mentioned in the Port Description section, the RJ9 Cord and the Sennheiser Y-Cord are also provided.

Cord	Description
RJ9 Cord	For the audio connection between the IP phone headset port and the Jabra (GN Netcom) wireless headset.
Sennheiser Y-Cord	For the audio connection between the IP phone headset port, Wireless Headset Adapter and the Sennheiser wireless headset.

Connect IP Phone and Headset

This section introduces the connection between SIP-T48S/T48G/T46S/T46G/T42S/T42G/T41S/T41P/T40P/T40G/T29G/T27P/T27G IP phones and the wireless headset. The following figures take the SIP-T46S IP phone as an example.

The following figure shows the connection between the IP phone and the Jabra (GN Netcom) wireless headset.

The following figure shows the connection between the IP phone and the Sennheiser wireless headset.

TIP
The sennheiser wireless headset must be running the latest firmware of the DW-Office series (version 96 or later) !

The following figure shows the connection between the IP phone and the Plantronics wireless headset.

This cord is provided by Plantronics.

EHS40

Package Contents

Port Description

No.	Description
①②	Allow you to connect the Jabra/Plantronics/Sennheiser wireless headset using the Jabra/Plantronics/Sennheiser Y-Cord.
③	Allows you to connect EHS40 and the IP phone.

NOTE
 If an expansion module has been connected to the SIP-T58A/T57W/T54W/T53W/T53/T48U/T46U/T43U IP phone, you can connect the EHS40 to the expansion module.

Cord Description

Cord	Description
RJ9 Cord	For the audio connection between the Wireless Headset Adapter EHS40 and the Jabra wireless headset.
Sennheiser Y-Cord	For the audio connection between the Wireless Headset Adapter EHS40 and the Sennheiser wireless headset.
Plantronics Y-Cord	For the audio connection between the Wireless Headset Adapter EHS40 and the Plantronics wireless headset.

Connect IP Phone and Headset

This section introduces the connection between SIP-VP59/T58A/T57W/T54W/T53W/T53/T48U/T48S/T46U/T46S/T43U/T42U/T42S/T41S IP phones and the wireless headset. The following figures take the SIP-T53 IP phone as an example. The following figure shows the connection between the IP phone and the Jabra (GN Netcom) wireless headset.

The following figure shows the connection between the IP phone and the Sennheiser wireless headset.

The following figure shows the connection between the IP phone and the Plantronics wireless headset.

Update EHS40

You can update the EHS60 firmware via Yealink USB Connect. You can refer to [Update Firmware](#).

NOTE
Contact Yealink Support to obtain the special software upgrade package.

& RJ45 (8 pins) to RJ12 (6 pins)

Cable C

5 pin to RJ45 (8 pins)

User Guide

Connect the IP Phone and Headset

NOTE

You need to enable EHS feature for the phone on the server side for the first time. The configuration item is **Wireless Headset Hookswitch Control Enabled**. Once the phone is configured, you can connect the EHS60 cord and headset.

Connect the Cisco IP phone

Connect the Avaya/Grandstream/Fanvil IP phone

NOTE

- For Avaya phones, you need to go to the phone's setup menu to enable the EHS feature. Once the phone is configured, you can connect the EHS60 cord and headset. Turn "switch hook and alert" to ON at the path: **Setting > audio > headset signaling > switch hook and alert ON** or **Options&setting > Call settings > headset signaling > switch hook and alert ON**.
- For Grandstream phones, you need to enable the EHS feature for this phone extension on the server side. Once the phone is configured, you can connect the EHS60 cord and headset.
 - 1) Set **HEADSET key mode** to **Default Mode** or **Headset/Hands-free Mode**.
 - 2) Set **Headset Type** to **Plantronics EHS**.
 - 3) Set **Always Ring Speaker** to **Yes**.

Connect the Poly IP phone

NOTE

You need to go to the setup menu of the phone to enable the EHS feature. Once the phone is configured, you can connect the EHS60 cord and headset. Set Hookswitch Mode to Jabra or Sennheizer mode at the path: **setting > basic > preferences > Headsethook > switch mode.**

Update EHS60

Ensure the product label sticker on your WH62/WH63 base has **EHS60 Supported**. Then you can use the device to update EHS60.

Procedure

1. Update WH62/WH63 to a special version that includes EHS60 firmware via Yealink USB Connect. You can refer to [Update Firmware](#).

NOTE

Contact Yealink Support to obtain the special software upgrade package.

2. Connect EHS60 to the Phone port of the WH62/WH63 base. If the **Phone** button glows white, the connection is successful.
3. Connect the PC port of the WH62/WH63 base to a PC.

Results

EHS60 automatically triggers the update.

- During the upgrade, the **Phone** button on the WH62/WH63 base flashes white and green alternately.
- If the upgrade is successful, the **Phone** button on the WH62/WH63 base will glow green for 5 seconds and then off.
- If the upgrade fails, the **Phone** button on the WH62/WH63 base will flash white for 5 seconds and then off. Then you can reconnect, and it will upgrade again.

NOTE

1. Reject any call or answer operations during the upgrade.
2. You need to upgrade your WH6X to the original or the newest version via Yealink USB Connect after upgrading the EHS60.

EHS61

Package Contents

Connect the IP Phone and Headset

Connect the Mitel & Unify Phone

NOTE

For Mitel Phones, you need to go to the phone's setup menu to enable the EHS feature for the first time. Once the phone is configured, you can connect the EHS61 cord and headset.

1. In **Settings** interface, press **Audio > Audio Mode** to select **Headset** or **Speaker/Headset** or **Headset/Speaker**.
2. Return to **Settings** interface, press **Audio > Headset** to select **DHSG is ON**.

For Unify Phones, you can plug and play.

Connect the Yealink IP phone

For Yealink Phones, you can plug and play.

Update EHS61

Ensure the product label sticker on your WH62/WH63 base has **EHS61 Supported**. Then you can use the device to update EHS61.

Procedure

1. Update WH62/WH63 to a special version that includes EHS61 firmware via Yealink USB Connect. You can refer to [Update Firmware](#).

NOTE

Contact Yealink Support to obtain the special software upgrade package.

2. Connect EHS61 to the Phone port of the WH62/WH63 base. If the **Phone** button glows white, the connection is successful.

3. Connect the PC port of the WH62/WH63 base to a PC.

Results

EHS61 automatically triggers the update.

- During the upgrade, the **Phone** button on the WH62/WH63 base flashes white and green alternately.
- If the upgrade is successful, the **Phone** button on the WH62/WH63 base will glow green for 5 seconds and then off.
- If the upgrade fails, the **Phone** button on the WH62/WH63 base will flash white for 5 seconds and then off. Then you can reconnect, and it will upgrade again.

NOTE

1. Reject any call or answer operations during the upgrade.
2. You need to upgrade your WH6X to the original or the newest version via Yealink USB Connect after upgrading the EHS61.

FAQ

Are all “EHS60 supported” headsets also available with EHS61?

Wi-Fi USB Dongle

WF40

Package Contents

Wi-Fi USB Dongle

User Guide

Assemble the Wi-Fi USB Dongle

1. Insert the Wi-Fi USB Dongle into the USB port on the back of the phone.

Connect the IP phone to an Available Wireless Network

To manually connect the IP phone to an available wireless network (take the SIP-T48G IP phone for example): After your phone is powered on and the system boots up, you can connect the IP phone to an available wireless network.

1. Insert the Wi-Fi USB Dongle WF40 into the USB port on the back of the phone when the phone is idle.
The touch screen prompts “Wi-Fi adapter has been added, scanning the available wireless network right now?”
2. Tap **OK** to activate Wi-Fi mode directly and scan Wi-Fi devices automatically.
3. (Optional.) To re-search the available network, tap the **Scan** soft key.
4. Tap the desired wireless network to connect to your IP phone. You can also tap after the desired wireless network, and then tap **Connect**.

5. If the network is secure, enter its password in the **Pin** field.

6. Tap **OK**.

Once the connection has completed successfully, the prompt “Connect Success.” appears at the end of the desired SSID.

You can also configure the Wi-Fi feature at the path:  > **Basic** > **Wi-Fi**.

NOTE
Contact your network administrator for the Wi-Fi password.

Disable Wi-Fi Feature on the IP Phone

To disable Wi-Fi feature, do one of the following (take the SIP-T48G IP phone for example):

- Tap  > **Basic** > **Wi-Fi**.
Mark the Off radio box in the Wi-Fi field.
- Unplug the Wi-Fi USB dongle from the IP phone.
The IP phone toggles the Wi-Fi to off.

Troubleshooting

Why can't the Wi-Fi feature be enabled?

- Ensure the Wi-Fi USB dongle is not broken.
- Ensure the Wi-Fi USB dongle is assembled and detected by the phone successfully.

Why can't the IP phone connect to the wireless network?

- If the network is secure, ensure the entered password is right.
- Ensure your gateway/router enables the wireless network feature.
- Reboot your gateway/router.
- Turn off the Wi-Fi feature on the IP phone and then turn it on again.

Why is the wireless signal strength low?

Ensure the IP phone and your gateway/router are within the working range and there is no obvious interference (walls, doors, etc) between them.

WF50

Package Contents

Wi-Fi USB Dongle WF50

User Guide

Introduction

Wi-Fi USB Dongle is used in following scenarios:

- For IP phones: connect to the wireless network.
- For video conferencing systems: connect to the wireless network or provide wireless AP (Access Point) for other devices.

NOTE
Not all IP phones and video conferencing systems support Wi-Fi USB Dongle. For more information, contact your system administrator.

Assemble the Wi-Fi USB Dongle

To assemble the Wi-Fi USB Dongle:

1. Insert the Wi-Fi USB Dongle to the USB port on the IP phone or video conferencing system.

Connect to the Wireless Network

To connect to an available wireless network via the IP phone (take the SIP-T46S phone for an example):

1. Assemble the Wi-Fi USB Dongle.
The LCD screen prompts "Wi-Fi adapter has been added, scanning the available wireless network right now?"
2. Press the **OK** soft key.
3. Select **X available network(s)**.
4. Select the desired wireless network and then press the **Connect** soft key.
5. (Optional.) Enter its password in the **Password** field.
6. Press the **OK** soft key.

Once the connection completes successfully, the icon  appears after the SSID.

To connect to an available wireless network via the video conferencing system:

1. Assemble the Wi-Fi USB Dongle.
The monitor prompts "Wi-Fi adapter is connected" .
 2. On your remote control, navigate to **More > Setting > Advanced > Wi-Fi**.
 3. Select the **Wi-Fi** checkbox.
 4. If you already enabled wireless AP, press OK to disable it.
 5. Select the desired wireless network and then press OK.
 6. (Optional.) Enter its password in the **Password** field.
 7. Select **Join to Network**.
- Once the connection completes successfully, the icon  appears on your monitor.

Provide Wireless AP for Other Devices

To provide wireless AP via the video conferencing system:

1. Assemble the Wi-Fi USB Dongle.
The monitor prompts "Wi-Fi adapter is connected" .
2. On your remote control, navigate to **More > Setting > Advanced > Wireless AP**.
3. Select the **Wireless AP** checkbox.
4. If you already enabled Wi-Fi, press OK to disable it.

Other devices can connect to this wireless AP. Once the connection is successful, the number of connections appears beside the  icon.

Troubleshooting

Why can't the Wi-Fi feature be enabled?

- Ensure the Wi-Fi USB dongle is not broken.
- Ensure the Wi-Fi USB dongle is assembled and detected by the phone/video conferencing system successfully.

Why can't the phone/video conferencing system connect to the wireless network?

- If the network is secure, ensure the entered password is right.
- Ensure your gateway/router enables the wireless network feature.
- Reboot your gateway/router.
- Turn off the Wi-Fi feature and then turn it on again.

Why is the wireless signal strength low?

Ensure the phone/video conferencing system and your gateway/router are within the working range and there is no obvious interference (walls, doors, and so on) between them.

Bluetooth USB Dongle

BT40

Dear Customers,

Yealink hereby informs you that the BT40 has been discontinued since May 31, 2019. After the date, new orders for the product would not be accepted.

After the End-of-Life date, Yealink will not pursue any new feature development on BT40, but we will follow the industry standard practices regarding software support of the discontinued (EOL) products. Consistent with such standards, Yealink will continue to offer support and after-sale service.

For more information about BT40 User Guide, please refer to: [BT40 Support](#).

BT41

Package Contents

BT41

Quick Start Guide

Assemble the USB Dongle

Pair & Connect Bluetooth Headset to the Phone

1. Turn on the Bluetooth headset.
2. Long press the multifunction key on the Bluetooth headset until the LED indicator alternately flashes red and blue.

The Bluetooth headset is in pairing mode.

3. Assemble the USB dongle.
4. Activate the Bluetooth feature on the phone.
Refer to corresponding user guide of the phone to activate the Bluetooth feature.

5. Select **Scan** on the phone.

The phone starts searching for Bluetooth headsets within the working range of 10 meters (32 feet) and displays all detected Bluetooth headsets.

NOTE

The USB dongle provided by Yealink supports hot plug. You can plug and unplug the USB dongle without rebooting the phone.

Answer Calls

1. With the Bluetooth headset paired and connected, press the multifunction key on the Bluetooth headset to answer an incoming call. If there is already an active call on the phone, the original call is placed on hold after answering the new incoming call.

Adjust the Earphone Volume

With the Bluetooth headset paired and connected, you can do the following:

- Press the Volume key (+) on the Bluetooth headset to increase the volume.
- Press the Volume key (-) on the Bluetooth headset to decrease the volume.

End Calls

With the Bluetooth headset paired and connected, press the multifunction key on the Bluetooth headset to end a call.

Troubleshooting

Why can't the phone detect the Bluetooth headset?

- Ensure the Bluetooth headset is turned on.
- Ensure the Bluetooth headset is in pairing mode when the phone is searching for Bluetooth headsets.

Why there is a noise?

- Check the battery level. If the battery level is low, charge the Bluetooth headset.
- Ensure the Bluetooth headset and the phone are within the working range of 10 meters (32 feet) and there is no obvious interference (walls, doors, etc.) between them.

Hardware Overview

LED Instruction

LED indicator on the Charger Cradle:

LED Status	Description
Solid white	The CPW65 is being charged.
Off	The CPW65 is not being charged.

Mute LED indicator on the CPW65:

LED Status	Description
Solid green	The phone enters the pre-dialing screen. The phone is in a call and unmuted.
Fast flashing red	The phone is receiving an incoming call.
Solid red	The phone is muted.
Fast flashing yellow	The CPW65 is in the registration mode.
Slowly flashing yellow	The CPW65 has registered with the phone, but the CPW65 is out of range. The CPW65 has registered with the phone, but the CP965 is turned off.
Flashing red and green alternately	The phone is searching for the CPW65 which has registered with it.
Off	The CPW65 is idle.

Battery LED indicator on the CPW65:

LED Status	Description
Solid green for one second and then off	The CPW65 is turned on.
Solid green for 3 seconds and then off	The CPW65 is idle.
Solid green	The CPW65 is fully charged.
Solid red	The CPW65 is being charged.
Fast flashing red 3 times and then off	The battery capacity is too low to turn on the CPW65.
Slowly flashing red	The battery capacity is less than 10%.
Off	If you tap the mute button and the battery LED indicator on the CPW65 is still off, it means the CPW65 is turned off.

Charge CPW65

Method 1	Method 2
<ol style="list-style-type: none"> Put the CPW65 on the charger cradle. Plug the provided micro USB cable into the micro USB port on the charger cradle, and into the USB port on the CP965. 	<ol style="list-style-type: none"> Plug the provided micro USB cable into the micro USB port on the CPW65, and into the USB port on the CP965.

When charging, the battery LED indicator on the CPW65 glows red. When it is fully charged, the battery LED indicator on the CPW65 will glow green.

The CPW65 starts up automatically when charging. Or you can long tap the Mute button on the CPW65 for 3 seconds to turn it on.

TIP

- If it is the first time you use the CPW65, you need to fully charge it for normal use.
- If the CPW65 is not in use, we still recommend charging it even when the battery is full.

Register CPW65 to CP965 Conference Phone

You can skip this chapter if the CPW65 has registered with the CP965 conference phone.

Otherwise, follow the steps below to register the CPW65 to the CP965 conference phone. The CPW65 works as the audio input device of the CP965 conference phone.

To register the CPW65 to the CP965 conference phone:

- On the CP965, tap **More > Mic >**

2. Turn on the CPW65.

The CPW65 enters the registration mode automatically. And the mute LED indicator on the CPW65 fast flashes yellow.

The CPW65 registers with the CP965 conference phone automatically. If the registration is successful, the mute LED indicator on the CPW65 goes out and the touch screen of CP965 conference phone prompts the CPW65 information: battery, work time and standby time.

TIP

You can connect up to two CPW65 to a CP965 conference phone.

Mute & Unmute CPW65

When the CPW65 works as an audio input device for the CP965 conference phone and the CP965 conference phone is in a call, you can tap the Mute button on the CPW65 to mute or unmute the CPW65.

Place CPW65 in a Conference Room

The CPW65 is a wireless expansion mic that can work as the audio input device of the CP965 conference phone. It supports 360-degree audio pickup at a radius of up to 3 meters. You can place the CPW65 on a conference table.

Do the following to ensure optimal voice quality:

- The CPW65 should be less than 20 meters from the CP965 conference phone, and there are no obstacles between them.
- Place the CPW65 on a stable surface and keep it away from obstacles, so that they can achieve the best performance.

FAQ

1. How to turn off the CPW65?

Long tap the Mute button on the CPW65 until the battery LED indicator the CPW65 glows red for 3 seconds and then goes out.

2. How to find the CPW65 which has registered with the CP965 conference phone?

1. On the CP965, tap **More > Mic**.
2. Select the desired microphone, and then tap **Find**.

The mute LED indicator on the CPW65 flashes red and green alternately.

3. How to register the CPW65 to another CP965 conference phone?

The CPW65 can only be registered to one CP965 conference phone. If you register the CPW65 to another CP965 conference phone, the CPW65 will deregister from the previous CP965 conference phone automatically. To register the CPW65 to another CP965 conference phone:

1. On the CP965, tap **More > Mic** > 
2. Charge the CPW65.
3. Long tap the Mute button on the CPW65 for 5 seconds.

The CPW65 enters the registration mode. And the mute LED indicator on the CPW65 fast flashes yellow.

The CPW65 registers with the new CP965 conference phone automatically.

4. How to deregister the CPW65?

1. On the CP965, tap **More > Mic**.
2. Select the desired mic, and then tap **Detail**.
3. Tap **Unbind** to deregister the CPW65.

CPW90

Package Contents

Wireless Expansion Mic×2 Charging Cradle

0.3m Micro USB Cable

Quick Start Guide

CPW90 Component Instruction

Charge the CPW90

1. Put the CPW90 on the charging cradle.
2. Connect the micro USB port on the charging cradle to the USB port on the CP960 using a 0.3m micro USB cable.

NOTE

- If it is the first time you use the CPW90, you need to fully charge the CPW90 for normal use.
- If the CPW90 is not in use, we recommend you to charge the CPW90 even when the battery is full.

Register the CPW90 with the CP960 Conference Phone

If you buy CP960-WirelessMic, the CPW90 is registered with the CP960 conference phone by default. In this situation, you can skip this chapter.

If the CPW90 is not registered with the CP960 conference phone, you should register the CPW90 with the CP960 conference phone manually. So that the CPW90 can work as expansion microphone of the CP960 conference phone.

1. Do the following on the CP960 conference phone:

Tap  > **Wireless Microphone**.
Tap  to search for a CPW90.

2. Turn on the CPW90.

The CPW90 enters the registration mode automatically. And the mute indicator LED on the CPW90 fast flashes yellow.

The CPW90 registers with the CP960 conference phone automatically. If the registration is successful, the mute indicator LED on the CPW90 goes out and the touch screen of CP960 conference phone prompts the CPW90 information: battery, work time and standby time.

TIP

You can connect up to two wireless expansion microphones to a CP960 conference phone.

LED Instruction

There are two indicators on the CPW90. The indicators display the CPW90 work status.

Mute indicator LED on the CPW90

LED Status	Description
Solid green	<ul style="list-style-type: none"> · The phone enters the pre-dialing screen. · Call mute mode is deactivated.
Slowly flashing red	The phone is receiving an incoming call.
Solid red	Call mute mode is activated.
Fast flashing yellow	The CPW90 is in the registration mode.
Slowly flashing yellow	<ul style="list-style-type: none"> · The CPW90 has registered with the phone, but the CPW90 is out of range. · The CPW90 has registered with the phone, but the CP960 is turned off.
Flashing red and green alternately	The phone is searching for the CPW90 which has registered with it.
Off	The CPW90 is in the idle mode.

Battery indicator LED on the CPW90

LED Status	Description
Solid green for one second and then off	The CPW90 is turned on.
Solid green for 3 seconds and then off	The CPW90 is in the idle mode.
Solid green	The CPW90 is fully charged.
Solid red	The CPW90 is being charged.
Fast flashing red 3 times and then off	The battery capacity is too low to turn on the CPW90.
Slowly flashing red	The battery capacity is less than 10%.
Off	If you tap the mute button, the battery indicator LED on the CPW90 is still off, it means the CPW90 is turned off.

Place the CPW90

The CPW90 is a wireless expansion mic which can work as expansion microphone of the CP960 conference phone. It supports 360-degree audio pickup at a radius of up to 3 meters. The CPW90 has a rubber pad on its base to prevent it from sliding. You can place the CPW90 on a conference table.

Do the following to ensure optimal voice quality:

- The CPW90 should be less than 20 meters distant from the CP960 conference phone, and is not disturbed by obstacles.
- Place the CPW90 on a stable surface and keep it away from obstacles so that it can effectively pick up sounds.

Mute/Unmute the CPW90

When the CPW90 works as an expansion microphone of the CP960 conference phone of the CP960 conference phone and the CP960 conference phone is in a call, you can tap the mute button on the CPW90 to mute or unmute the CPW90.

FAQ

How to turn off the CPW90?

Long tap the mute button on the CPW90, until the battery indicator LED on the CPW90 illuminates solid red for 3 seconds and then goes out.

How to find the CPW90 which has registered with the CP960 conference phone?

1. Tap  > **Wireless Microphone**.
2. Select the desired mic, and then tap **Find**.
The mute indicator LED on the CPW90 flashes red and green alternately.

How to register the CPW90 with another CP960 conference phone?

The CPW90 can only be registered with one CP960 conference phone. If you want to register the CPW90 to another CP960 conference phone, the CPW90 will be deregistered from the previous CP960 conference phone automatically.

1. Do the following on another CP960 conference phone:
 - o Tap  > **Wireless Microphone**.
 - o Tap  to search for a CPW90.
2. Put the CPW90 on the charging cradle and make sure it is charging.
3. Long tap the mute button on the CPW90 for 5 seconds.
The CPW90 enters the registration mode. And the mute indicator LED on the CPW90 fast flashes yellow.
The CPW90 registers with another CP960 conference phone automatically, and is deregistered from the previous CP960 conference phone.

What is the idle mode?

When the CPW90 registers with the CP960 conference phone successfully, the CPW90 enters the idle mode. In idle mode, if you tap the mute button on the CPW90, the battery indicator LED on the CPW90 will illuminate solid green for 3 seconds and then go out.

How to deregister the CPW90 from the CP960 conference phone?

1. Tap  > **Wireless Microphone**.
2. Select the desired mic, and then tap **Detail**.
3. Tap Unbind to deregister the CPW90.

- ④ Charging Slot

Charge the CPW90-BT

- ② 1.8m Micro USB Cable

1. Put the CPW90-BT on the charging cradle.
2. Connect to the power source.

During charging, the battery indicator illuminates solid red. When the battery capacity reaches 100%, the battery indicator illuminates solid green. When you charge the bluetooth wireless microphones, the bluetooth wireless microphones will start automatically. You can also long tap the mute button on the bluetooth wireless microphone for 3 seconds to turn it on.

NOTE

- If it is the first time you use the CPW90-BT, you need to fully charge the CPW90-BT for normal use.
- If the CPW90-BT is not in use, we recommend you to charge the CPW90-BT even when the battery is full.

Find the Paired Bluetooth Wireless Microphones

1. On your remote control, navigate to **More > Setting > Video & Audio > Wireless Micphone**.
2. Select the desired bluetooth wireless microphone and press the **OK** key.
3. Select **Find**.
The mute LED indicator flashes red and green alternately.
4. Select **Cancel**.

Mute/Unmute the CPW90

1. Tap the mute button to mute it.
The mute LED indicator illuminates solid red.
2. Tap the mute button again to unmute it.

DECT USB Dongle

DD10K

Introduction

DECT USB dongle DD10K allows you to turn the SIP-T41S/T42S/T54W IP phone to the DECT desk phone (hereinafter referred to as DD phone). After that, you can use the IP phone as a handset with a base station.

DECT USB dongle DD10K also allows you to turn the SIPT58V/T58A/T58W/T56A/T53/T53W/T54W/T57W/VP59 IP phone to the corded-cordless phone.

After that, you can use the IP phone as a base station and its handset 1.

The features introduced in this guide apply to the following Yealink IP phones:

- SIP-T41S/T42S IP phones running firmware V82 or later.
- SIP-T58V/T58A/T58W/T56A IP phones running firmware V83 or later.
- SIP-T53/T53W/T54W/T57W/VP59 IP phones running firmware V85 or later.

NOTE

EOL Products: T41S/T42S/T58V/T58A/T56A

Package Contents

DD10K

Quick Start Guide

Assemble the DD10K

1. Insert the DD10K into the USB port on the back of the phone.

If the firmware versions of the DD10K and IP phone do not match, the IP phone will upgrade/downgrade the DD10K.

Get Started (for T58V/T58A/T58W/T56A/T53/T53W/T54W/T57W/VP59)

Handset Registration Mode

Before registering the handset, make sure the IP phone is in the registration mode.

To set the IP phone to the handset registration mode:

1. Insert the DD10K.
2. Swipe left or right to go to the second idle screen.
3. Navigate to **DECT Settings > Handsets**.
4. Tap **Register** (press **Start Reg** for T53/T53W/T54W).

Handset Registration

You can register up to other four handsets to one phone.

The supported handsets include W52H, W53H, W56H, W59R, W73H, and DD phone.

To register the handset when the phone prompts "Unregistered!", do one of the following:

Way 1: Press the **Reg** soft key to register quickly.

Way 2:

1. Do one of the following:
 - Press the OK soft key, and then select **Register Handset**.
 - Press **☰**, and then select **Settings > Registration > Register Handset**.

The handset begins searching for the phone.

2. Press the **OK** soft key after a phone is found.
3. Enter the base station PIN (default: 0000), and then press the **OK** soft key to complete the registration.

NOTE

- If the handset is registered to the phone successfully, the phone prompts “Subscribed Succeed” .
- If the handset prompts “Searching for Base” , check whether your phone is in the handset registration mode or not.

Switch Modes between DD Phone and CC Phone (for T54W)

1. Assemble the DD10K.
2. Press the **Menu** soft key when the phone is idle, and then select **Status > Phone Mode**.
3. Select the desired mode and click **OK**.

The phone will reboot to make the change take effect.

Check the Dongle Status (for T58V/T58A/T58W/T56A/T53/T53W/T54W/T57W/VP59)

To check the dongle status for T58V/T58A/T58W/T57W/T56A/VP59:

1. Insert the DD10K.
2. Swipe left or right to go to the second idle screen.
3. Navigate to **Settings > Status > Dongle**.

To check the dongle status for T53/T53W/T54W:

1. Insert the DD10K.
2. Press the **Menu** soft key when the phone is idle, and then select **Status > Dongle Status**.

Get Started (for T41S/T42S/T54W)

DD Phone Mode

Before using a IP phone as a DECT desk phone, you should enable the DD phone mode first.

To enable the DD phone mode when the IP phone is powered on (only for firmware version 84 or later):

1. Insert the DD10K.
The phone screen prompts you whether to switch to the DD phone mode.
2. Press the **OK** soft key to continue, and the phone switches to the DD phone mode after rebooting.

To enable the DD phone mode when the IP phone is powered off:

1. Insert the DD10K.
2. Power on the IP phone.
The IP phone switches to the DD phone mode automatically after startup.

If you purchase the DD10K package, you should manually register the DD phone to one Base station.

Registration

You can register the DD phones to W70B/W80 Multi-Cell System/W90 Multi-Cell System. Each DD phone can be registered to only one base station.

Before registering the DD phone, make sure the base station is in registration mode (long press  on the base station till the registration LED flashes).

To register the DD phone when the phone prompts “Unregistered!” , do one of the following:

Way 1: Press the **Reg** soft key to register quickly.

Way 2:

1. Do one of the following:
 - Press the **OK** soft key, and then select **Register Handset**.
 - Press , and then select **Settings > Registration > Register Handset**.

The handset begins searching for the phone.

2. Press the **OK** soft key after a phone is found.
3. Enter the base station PIN (default: 0000), and then press the **OK** soft key to complete the registration.

NOTE

- If the DD phone is registered to the base station successfully, the phone prompts “Subscribed Succeed” .
- If the DD phone prompts “Searching for Base” , check whether your base station is powered on or not.
